

African officials' visit to the pilot site which uses treated wastewater for irrigation, developed by the ACCBAT project at the INGRES agricultural experimental station at Oued Souhil, in Nabeul, Tunisia

On 24th November 2014, African officials from Burkina Faso, Burundi, Chad, Ivory Coast, Comoros, Democratic Republic of Congo and Senegal visited the agricultural experimental station at Oued Souhil, in Nabeul.

The visit was organised by INAT (National Agronomic Institute of Tunisia) under the Cooperation Programme between the Tunisian Agency for Technical Cooperation and the Arab Fund for Development.

The visitors were accompanied by Mrs Jamila Tarhouni (INAT). An information session on the modern and innovative system which uses treated wastewater for irrigation, developed by the ACCBAT Project, was presented by Mr Hammadide Ali and Mrs. Rim Ghrib (UEA/NRGREF), and Mr. Lorenzo Errighi and Mr. Valerio Rizzo (ICU - ACCBAT).
